from the Savannah River Site

Draft End State Vision Document is Available for Public Comment

The revised draft Savannah River Site (SRS) End State Vision Document is now available for your review and comment. The SRS End State Vision Document is a concise stakeholder's guide to current conditions at SRS and the conditions we plan to achieve through the Site's Environmental Management (EM) Cleanup Project ("end states") at SRS. It is designed to facilitate understanding and dialogue on the goals of the EM cleanup mission at SRS. The public comment period will end April 25, 2005.

The draft SRS End State Vision Document describes the current and end-state hazards. You will find the document understandable and useful as an information source for future decisions about area and hazard end states.

One thing is certain - planned end states are not static. They have changed over time, even recently, and will continue to change as we continue to seek and find new ways to reduce risks at SRS more cost-effectively. The draft SRS End State Vision Document will be periodically reviewed with our stakeholders, recognizing that planned end states will evolve.

A public workshop is scheduled for Thursday, March 24, for an informational overview of the document. Public comments on the document will also be received at that time. The workshop will be held at the North Augusta Community Center from 10:00 AM – 4:00 PM. You can find this document at <http://sro.srs.gov/pubact1.htm>. If you are interested in receiving a copy of the document, please send your request to:
